

project HAPONESA

music + living space in the heart of manila

location: QUEZON CITY, PH

area: 94.8 sqm

The amalgamation of music and living space into a loft unit located in a 5-storey condominium in Tandang Sora, QC materializes with the **HAPONESA STUDIO**. The fused space exhibits Japanese design sensibilities, particularly; **material purity, simplicity, and space optimization.**

Materials used are mainly wood for acoustic purpose, concrete for structural, and metal as accent. As a music studio, the whole unit is enwrapped by modular wooden triangulations that serve acoustical needs and yet provides the entire space with integrative vibrations.

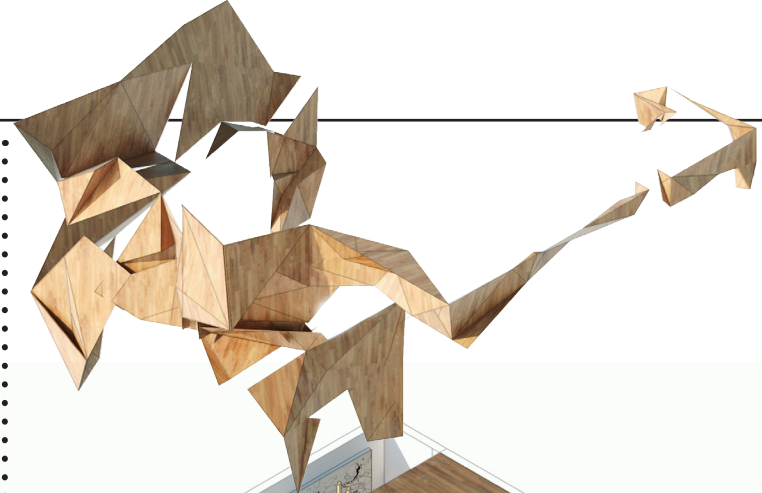

Each space connects with one another via open visual accessibility at all points, unifying as a home, yet where one can also flexibly and comfortably immerse in art and music, whether alone or sharing it with co-inhabitants of the studio.
